

EHG Complete

Your warehouse without
the floorspace

Procurement 4.0: Optimisation through outsourcing.

EHG Complete is equivalent to completely outsourcing your supply management, as EHG takes over the storage and processing of customer-specific material and deals with all warehousing and supply logistics.

Cost-effective

With EHG Complete, you have the freedom to use previously unproductive warehousing space for activities that create value.

Efficient

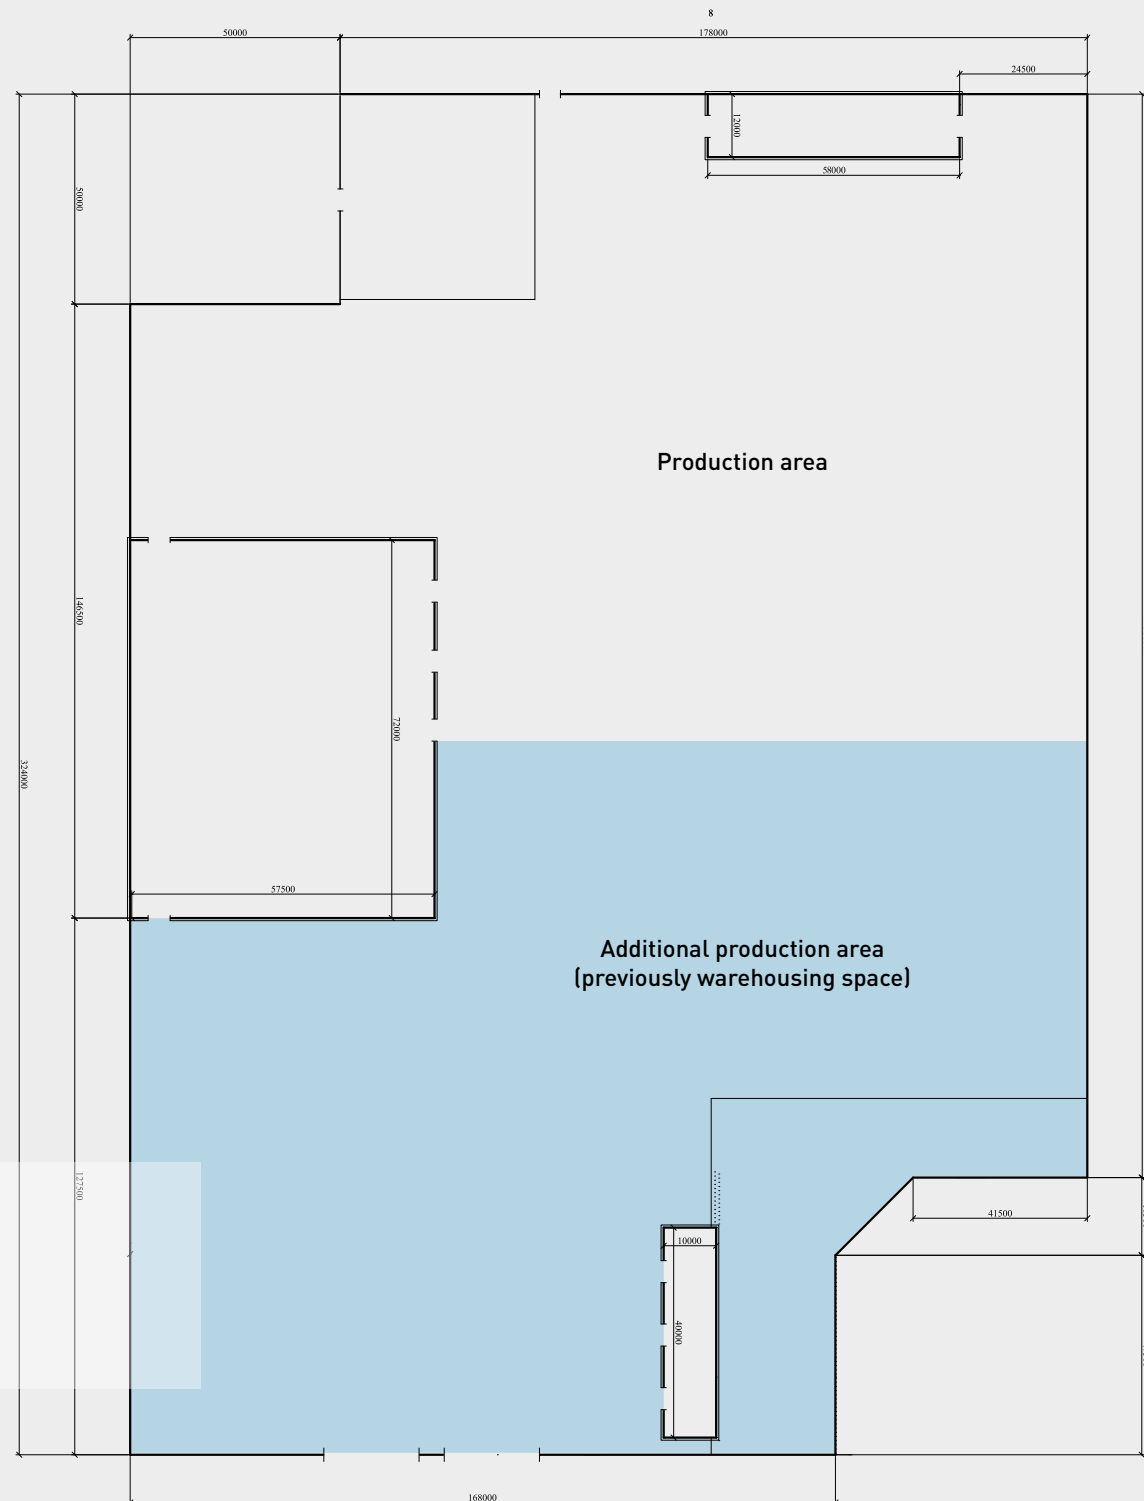

Completely integrating your ERP system into the EHG infrastructure makes fully automated order processing possible. The optimised procurement process reduces your administrative workload, as well as the error rate in orders.

Reliable

You define the minimum stock level to ensure a continuous supply of materials. All parts, finished according to your needs, are kept in stock. This saves you time, and gets the material to where it is wanted in record time.

With EHG Complete, multi-level coordination, warehousing costs and time spent processing are a thing of the past.

EHG Complete improves cost-effectiveness: what used to be warehousing space can be used for productive activities.

By handing over full responsibility for warehousing to EHG, you gain a lot of additional floorspace that you can use productively.

» Cost-effectiveness

Turning floorspace from a cost to a benefit.

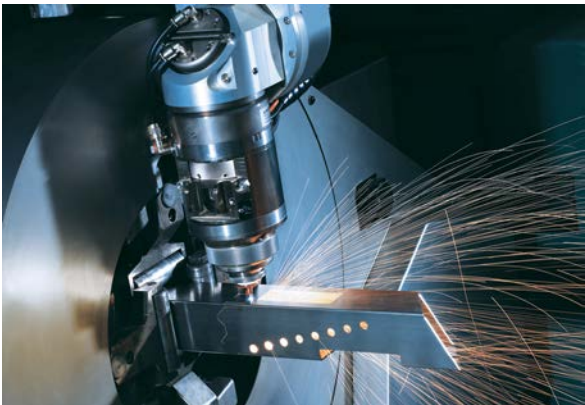

As industrial floorspace becomes increasingly scarce, companies need to make more efficient use of the existing space. EHG Complete makes room.

Productive and efficient

With EHG Complete, you gain additional floorspace for tasks that actually create value – instead of wasting space for storage racks and processing areas, you create room for your production.

Convenient and risk-free

There is no need to invest in new warehouse buildings, crane systems and processing machines, and you no longer have to commit capital for materials. This increases your liquidity and eliminates the risk of having to adjust the value of any remaining stock. Costs can be calculated exactly, as with EHG Complete, you benefit from guaranteed prices for far longer. Pooling the overall volume also results in price advantages for procurement.

Materials finished exactly as the customer requires are available from stock – from Europe’s most modern cutting and sawing centre.

Your benefits	
■	Productive utilisation of available floorspace
■	Increased value creation
■	Guaranteed, favourable conditions
■	No investment in warehouse infrastructure
■	No capital commitment
■	No risk of value adjustment

»Procurement with EHG Complete really takes the pressure off. It means we can remain flexible in future.«

Peter Puchner, MLBT, Head of Purchasing Department
Supply Chain Management, Rosenbauer International AG

» Efficiency

Smooth procurement processes.

The classic method of material procurement monopolises resources, takes up a lot of time and is prone to errors. Automated order processing provides the remedy.

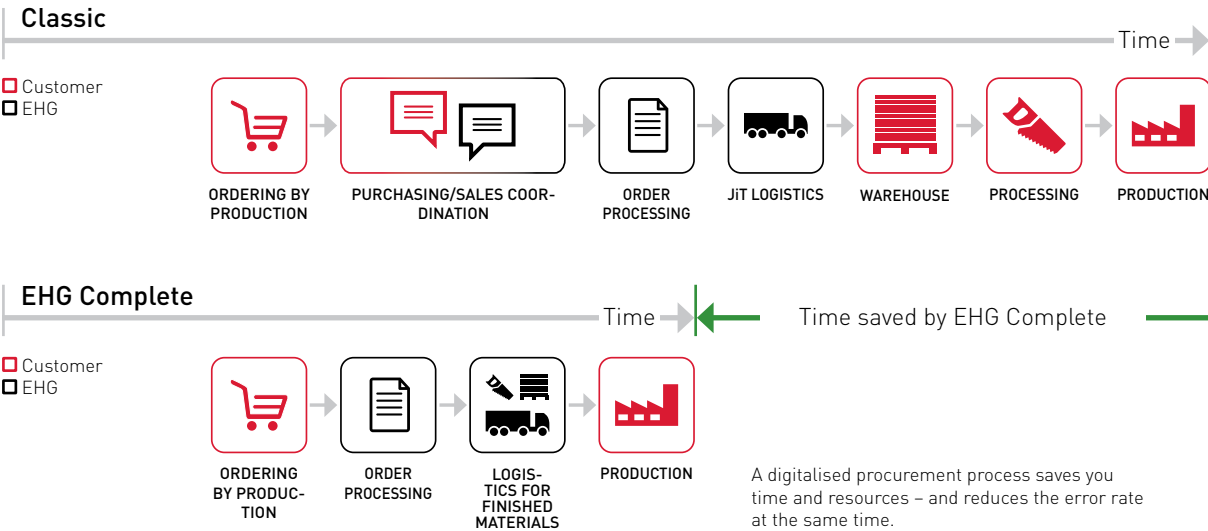

Fast-paced procurement

With EHG Complete, you are given a direct, 1-to-1 data connection from your ERP system to EHG. The result is a fully automated procurement process from order to invoice – with no paper involved. The lean processes greatly simplify material procurement and reduce lead times.

Processes with quality

High utilisation and deadline pressure make processes more error-prone – work is duplicated, or the wrong material is delivered. EHG Complete reduces the administrative workload and makes errors less likely during the procurement process – as well as making sure that you can use your resources for activities that create added value.

Material procurement with EHG Complete

◀ Everything in one place: call up the order, delivery note and invoice in your own ERP system and view all factory certificates together with online access.

- Your benefits**
- Less time spent on material procurement
 - Fewer errors
 - Reduced administrative workload

»Another method of material supply would be unimaginable for us today.«

Karl-Heinz Zündel, Head of Production
Doppelmayr

» Reliability

A guaranteed supply of custom-made materials.

Unforeseen events often lead to deadline pressure. If the required material is then not available in the right format, there is the potential of downtime – and subsequent losses. Not with EHG Complete.

Prompt delivery...

EHG Complete guarantees to keep all the requisite material grades in stock – finished as required – in sufficient quantities. You define your own reserve stock level. This means you can be sure that material will be supplied promptly, even when deadlines are extremely tight.

...according to your needs

Deliveries with EHG Complete are as individual as the material you have in stock. Individual order items are labelled, collected and delivered according to your needs – grouped by cost centre or machine group, for example. And if you suddenly have a demand for unexpected material grades, the EHG online shop has a range of more than 20,000 items in 150 different grades.

A special order? The EHG online shop gives you access to more than 20,000 items 24 hours a day – delivered just-in-time and with the precision and quality assurance you have come to expect from EHG.

Your benefits

- A reliable supply of materials
- Processing times are eliminated
- Labelling and delivery in line with customer requirements

» Compatibility

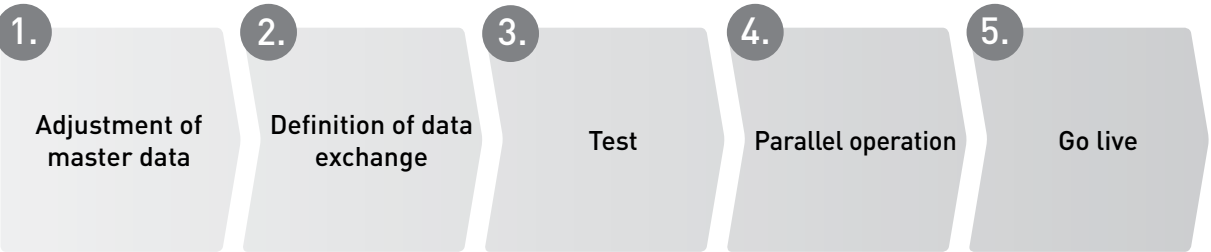

Easy integration.

People are often sceptical about new systems, as they are afraid of change. EHG Complete is integrated into the ERP system as seamlessly as your own on-site infrastructure. A familiarisation period for your staff is no longer required.

Fast and smooth
EHG Complete is introduced in five clearly defined phases and can be implemented rapidly. EHG has years of experience to ensure smooth interaction with your existing ERP system.

Flexible and reliable
EHG Complete supports numerous established standards and works together with myOpenFactory. It can therefore be seamlessly integrated into all common ERP systems. Secure connections and redundant servers guarantee maximum data and system security at all times.
